3144 Main St  
Sumneytown, PA 18084

Customer ID: **7405**  
Certificate: **23-C-0160**  
Site: 001  
ALISON UELAND

Type: ROUTINE INSPECTION  
Date: 01-OCT-2015

### 2.40(a)(1)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Section 2.40(a)(1) Veterinary care: The written Program of Veterinary Care (PVC) for this facility lacks specific guidance for the care of animals. There is no specific guidance for the parasite control of various species, only a list of drugs. Species specific dosing and route is not included for any species or drug. Specific guidance from the attending veterinarian is required for all drugs used by the licensee. Additional specific guidance is required for the PVC. Failure to have specific accurate guidance does not ensure the attending veterinarian is aware of the current practices at the facility and also does not ensure the facility has accurate guidance to provide adequate care to the animals. Correct this by developing and implementing a complete, accurate Program of Veterinary Care for all species housed at the facility. Correct by November 1, 2015.

### 2.40(b)(4)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Section 2.40(b)(4) Veterinary care: The licensee is removing the scent glands from young skunks without written guidance from the attending veterinarian. Each exhibitor must establish and maintain programs of adequate veterinary care that include adequate guidance from the attending veterinarian regarding anesthesia and surgical procedures. Specific guidance from the attending veterinarian is required for all medical/surgical procedures performed by the licensee or other facility personnel. Failure to have specific accurate guidance does not ensure the attending veterinarian is aware of the current practices at the facility and also does not ensure the facility has accurate guidance to provide adequate care to the animals. Correct this by developing with the attending veterinarian a complete, accurate, written description of the method used to remove the scent glands to include the procedure, facilities, equipment, anesthetics, and care of the animals. Correct by November 1, 2015.

### 3.58(a)

#### CLASSIFICATION AND SEPARATION.

Section 3.58(a) Classification and separation: A rabbit is housed in an enclosure with chickens. The chicken feces may contaminate the food for the rabbit and the surfaces of the enclosure. Fecal material may contain bacteria and

## Inspection Report

---

parasites and cause the rabbit to become ill. Rabbits must not be housed in the same primary enclosure with any other species of animals for their health and to comply with the Animal Welfare regulations. Correct by October 3, 2015.

An exit briefing was conducted with the licensee.
