Certificate: **43-A-4362**

Site: 001

JERRY MC CLURE & ALLEN STRENKE

Type: ROUTINE INSPECTION

Date: 03-JUN-2014

2.40(b)(2) REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

(2) The use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries, and the availability of emergency, weekend, and holiday care;

* A female Silky Terrier (#157) nursing two puppies (DOB 4-19-14) is very thin with easily palpable ribs and defined vertebrae. She had a build up of brown, gray-green material on her back teeth with gums that were swollen and when touched, a thick yellowish- white discharge occurred. She also has matted hair on the face and legs that are dangling and pulling on the skin.

The appearance of vertebrae and ribs may be an indication of malnourishment, parasites or other illness. Swollen gums may make eating painful also. Hair that is matted and pulling on the skin can cause discomfort and pain to the animal. The licensee must remove the matted hair and have this dog examined by a veterinarian. The licensee must ensure that a effective hair coat maintenance program is adhered to at all times to prevent matting of the hair and that all animals receive adequate veterinary care with documentation (preferably in writing) of any treatments, prescriptions or medical programs prescribed.

3.1(a)

HOUSING FACILITIES, GENERAL.

(a) Structure; construction. Housing facilities for dogs and cats must be designed and constructed so that they are structurally sound. They must be kept in good repair, and they must protect the animals from injury, contain the animals securely, and restrict other animals from entering.

* Four enclosures had holes (approximately 4 in. x 4 in.) that were previously used for self feeders on the top of the enclosure. Dogs were seen to push their head through the hole. These enclosures no longer protect the dogs from possible injury. Licensee must ensure that all housing facilities are maintained and protect the animals from injury and contain them securely.

* To be corrected by: 6/17/14

Prepared By: ANGELA DEPOE, A C I USDA, APHIS, Animal Care

Inspection Report

3.1(c)(2)

HOUSING FACILITIES, GENERAL.

(2) Maintenance and replacement of surfaces. All surfaces must be maintained on a regular basis. Surfaces of housing facilities--including houses, dens, and other furniture-type fixtures and objects within the facility--that cannot be readily cleaned and sanitized, must be replaced when worn or soiled.

* The door frame on a wooden dog house with a male, Yorkshire Terrier was chewed all around the entrance edges. A water bowl (with three dogs) was excessively chewed down along one half of the bowl. These chewed surfaces are unable to be readily cleaned and sanitized. Licensee must ensure that all surfaces and objects within the facility are maintained and repaired/ replaced when worn, in disrepair or can no longer be readily cleaned and sanitized.

* To be corrected by: 6/17/14

Inspection and exit interview were conducted with facility representative.

** Non compliant item 2.40 (b)(2) report dated 3/24/14 was addressed.
