Type: ROUTINE INSPECTION

Date: 11-JUL-2023

2.40(a)(1)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The facility employs an attending veterinarian on a part-time basis and does not currently have a written program of veterinary care documenting this arrangement. A written program of veterinary care is important for ensuring veterinary care is provided for the animals on-site. Correct by September 14, 2023, by documenting a written program of veterinary care in collaboration with the attending veterinarian.

3.127(d)(1)

Facilities, outdoor.

There is one enclosure housing two black bears not contained within an 8ft perimeter fence. A perimeter fence must be strong and tall enough to prevent unauthorized people and animals, and to act as a secondary containment system in the event that an animal escapes from its primary enclosure. Correct by maintaining a perimeter fence around the enclosure that is at least 8 feet tall and 3 feet away from the primary enclosures, or by obtaining a written approval by the Administrator. Correct by November 3, 2023.

This inspection and exit interview were conducted with the facility representatives.
