### 2.40(b)(1)

#### Attending veterinarian and adequate veterinary care (dealers and exhibitors).

APHIS officials noticed two mini zebu cattle and one goat with elongated hooves. The goat had both front hooves elongated with a curve to the left. The two mini zebras had elongated hooves on all four limbs. Elongated and curved hooves can cause discomfort, pain, and changes in the animal strides that can lead to further medical issues. Each dealer or exhibitor shall establish and maintain programs of adequate veterinary care that include the availability of appropriate facilities, personnel, equipment, and services to comply with the provisions of this subchapter.

To be corrected by August 5, 2024.

This inspection and exit interview were conducted with Facility Representative.
