Certificate: **93-C-0275**

Site: 001

KERN COUNTY
SUPERINTENDENT OF
SCHOOLS

Type: ROUTINE INSPECTION

Date: 12-SEP-2024

2.134(a)(1)

Contingency planning.

The emergency action plan addresses animal escapes and human emergencies, but has not been updated to a hazards based approach, including HVAC fail or electrical outages as required by the Animal Welfare Act. Contingency plans must identify emergencies such as electrical outages, faulty HVAC systems, fires, mechanical breakdowns and natural disasters most likely to be experienced by the facility in order to provide for the welfare of the covered animals.

Correct by: 10/04/2024

3.153(a)(1)(i)

Primary enclosures.

A number of enclosures had sharp points present:

There were screws and nails pointing into the enclosure containing 2 Red tailed Hawks and the enclosure with a Screech owl.

There were loose metal bands and sharp screws pointing into an enclosure with 2 Crows and another enclosure with a Raven.

There was piece of broken metal tape in the Enclosure containing a ferruginous hawk and a Swainson's hawk.

All of the birds were free in each of their enclosures with access to the sharp points. The primary enclosure must be constructed and maintained so that they have no sharp points that could potentially injure the birds.

Correct by: 09/27/2024

3.153(a)(1)(ix)

Primary enclosures.

A Red-Tailed Hawk Enclosure had many walls with exposed damaged plywood that was not able to be effectively cleaned and sanitized. Additionally, the woodpecker enclosure had rusty support beams. Enclosures must be constructed and maintained so that all surfaces in contact with the birds may be readily cleaned and/or sanitized in accordance with 3.158 or be replaced when worn or soiled.

Inspection Report

3.154

Environment enhancement to promote psychological well-being.

The facility did not have a documented environment enhancement plan to promote psychological well-being of their avian species as required by the Animal Welfare Act. The facility must develop, document and follow a species appropriate plan for environmental enhancement adequate to promote the psychological well-being of birds. The plan must be approved by the attending veterinarian, and at a minimum must address social grouping, environmental enrichment, special considerations, restraint, and exemptions to the plan regulation and be in accordance with currently accepted professional standards.

Correct by: 09/26/2024

3.158(a)(1)

Cleaning, sanitization, housekeeping, and pest control.

The primary enclosure with a RedTailed Hawk was dirty with a buildup of wet excrement covering the walls. Insufficient cleaning can lead to disease hazards, insects, pest and odors. Excreta must be removed from within, under, and around the primary enclosure often enough to prevent excessive accumulation.

Correct by: 09/26/2024

This inspection and exit interview were conducted with Facility Representative.
