Certificate: **48-C-0140**
Site: 001
CITY OF DODGE CITY

Type: ROUTINE INSPECTION
Date: 08-DEC-2016

3.125(a)

FACILITIES, GENERAL.

Two access gates on the rear portions to the longhorn cattle enclosure and the llama enclosure are in need of repair. The gate for the cattle is attached by one hinge and a chain. This gate is leaning resulting in a gap between the gate and the fence. The gate for the llama cannot be completely closed due to a build-up of dirt at the bottom of the gate. This is creating a gap between the gate and the fence. Animals could be trapped in these gaps which can cause injury. Housing facilities must be structurally sound and maintained in good repair to protect the animals from injury and to securely contain the animals. Correct by 8 Jan. 2017.

This inspection and exit interview were conducted with a facility representative.

Additional Inspectors

Engel D.V.M Dominique, Hpa Gov User
