Type: ROUTINE INSPECTION

Date: 27-NOV-2018

3.131(a)

SANITATION.

There was a moderate to heavy amount of excreta in one enclosure at both the beef and sheep units. Although the facility has a cleaning schedule in place at both units, it does not appear to be often enough to remove excessive amounts of excreta, for the amount of animals currently housed in these enclosures.

Excreta shall be removed from primary enclosures as often as necessary to prevent contamination of the animals contained therein and to minimize disease hazards and to reduce odors.

To be corrected by December 10, 2018

This inspection and exit interview were conducted with the facility representative.
