Facilities, outdoor.

The perimeter fence that surrounds the enclosures for the 2 lions and 6 tigers needs repair. Several of the fence posts located near the entrance to this compound are unstable and leaning inward. In addition, this issue appears to reduce the height of the fence below 8 feet in this area.

A perimeter fence must be constructed so that it protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with the animals in the facility, and so that it can function as a secondary containment system for the animals. The facility has a plan to address this issue, which includes replacing the affected fence posts.
