### 2.40(a)(1)

#### **Attending veterinarian and adequate veterinary care (dealers and exhibitors).**

The facility did not have an updated program of veterinary care available for review on today's inspection. The current program of veterinary care does not include the hedgehog, cow, or White Tail deer.

The written program of veterinary care is needed to ensure that the facility understands the expectations of the attending veterinarian in regards to the veterinary care of regulated animals. The facility should ensure that the written program of veterinary care is available for review during all USDA inspections.

### 3.4(c)

#### **Outdoor housing facilities.**

The current housing structure in the outdoor dog pen is constructed of painted and wooden surfaces that are not impervious to moisture. Building structures made of unsealed wood cannot be properly cleaned or sanitized when permeable to moisture. The applicant must ensure that all structures the dog comes in contact with are impervious to moisture and able to be readily cleaned and sanitized or removed/replaced once they become worn or soiled.

This is a 1st Re-License Inspection for a Class "C" license. The inspection and exit briefing were conducted with the applicant.
