Newport, MI 48166

Customer ID: **6002855**
Certificate: **34-C-0453**
Site: 004
Tyler Foland

Type: ROUTINE INSPECTION
Date: 26-MAR-2025

3.75(a)

Housing facilities, general.

There were four or more missing ceiling tiles above the primary enclosure of two spider monkeys that the facility representative reported had been pulled down by the spider monkeys. There were exposed electrical wires and what appeared to be a hanging smoke detector within reach of the spider monkeys. An intact ceiling tile contained an electrical box with capped wires hanging down that the spider monkeys would be able to reach through the top of their primary enclosure.

Failure to maintain structurally sound housing facilities for nonhuman primates that protect them from injury, such as having electrical cords within reach, may result in adverse events such as electrocution or strangulation.

Exhibitors must design and construct housing facilities that are structurally sound for the species of nonhuman primates housed and protect them from injury.

To be Corrected by: March 28th, 2025

This inspection and exit interview were conducted with facility representative.
