Board

Type: RE-LICENSE INSPECTION

Date: 07-MAY-2024

2.40(b)(3)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

An approximate 3 year old male domestic turkey (broad breasted bronze) "Larry" has some abnormal health conditions that have not been communicated with the attending veterinarian. There is some feather loss, an approximate 5 inches by 3 inches area, along his chest with some feather growth starting as well as some poor conditioned tail feathers. The facility states he may be plucking his chest feathers. Both feet appear to be swollen and he walks with a minor limp. The facility states he may also be obese and he has been this way for a while. The facility has not contacted their attending veterinarian regarding these abnormal conditions. Poor feather condition and swollen extremities with limping could indicate an underlying health issue and if left untreated could result in the pain, physical or psychological distress or additional systemic problems.

The licensee must have frequent and direct communication with the attending veterinarian so that timely and accurate information on problems of animal health, behavior, and well-being can be evaluated by the attending veterinarian. This animal must be evaluated by a licensed veterinarian for an accurate diagnosis and to develop an effective treatment plan.

This is a 1st Re-License Inspection for a Class "C" license. The inspection and exit briefing were conducted with the Director and Operations Supervisor.

All items must be in compliance within 2 more inspections or by 6-July-2024 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

Regulated activity can continue under your existing USDA license until it expires.
