

Inspection Report

West Coast Game Park Inc
46914 Hwy 101
Bandon, OR 97411

Customer ID: **3437**
Certificate: **92-C-0181**
Site: 001
West Coast Game Park Inc

Type: ROUTINE INSPECTION
Date: 15-APR-2024

2.40(b)(3) Direct

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

* Goats, sheep, and Fallow Deer are intermingled in the back pasture when not on exhibit roaming the park. All the deer are showing signs of a dull, rough, hair coat along the back. Approximately 20 of the deer have patchy hair loss along their body, with a mottled appearance to the neck, areas of complete hair loss encircling their eyes and along the top of the muzzle. Two of the deer (identified as not on exhibit) are thin to extremely thin (visible ribcage, prominent pelvic bones) with significant (over 75%) hair loss. This type of hair condition/ loss is not consistent with seasonal shedding. The attending veterinarian has not been consulted nor is there any recorded documentation about the coat or weight loss. The body conditions, coat appearance and hair loss can be indicators of parasites, nutritional deficiencies, or other underlying medical conditions. The co-mingling of animals must also be considered for possible transmission of parasites or disease. Licensee must seek veterinary care for these animals and document all diagnosis/treatments as applicable for review upon request by the inspector.

** To be completed by: 4/24/24

* Two Bengal tigers (female and male) got into a fight during the early evening on 10/14/23, when the male tiger entered the female's den. Keepers were present and witnessed the altercation, ultimately separating the cats physically for the rest of the night. Upon visual examination, the keepers saw no open wounds or blood, evaluating that the male tiger just appeared 'sore'. When they checked on the tigers the next morning, the 17yr. old male tiger was deceased. That is when the attending veterinarian was notified. Lack of communication in a timely manner could have contributed to the death of the tiger.

Licensee must ensure that information on problems of animal health, behavior and well- being is conveyed in a timely manner to the attending veterinarian to help assist in providing the best healthcare possible. (CRITICAL)

** To be corrected by: from this day forward (4/18/24)

This inspection and exit interview were conducted with facility representative.
