

## Inspection Report

Johnson College  
3427 N Main Avenue  
Scranton, PA 18508

Customer ID: 759

Certificate: 23-R-0067

Site: 001

VETERINARY SCIENCE CENTER/ JOHNSON TECHNICAL  
INSTI

Type: ROUTINE INSPECTION

Date: 17-JAN-2017

### 2.31(c)(3)

#### INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

Section 2.31(c)(3) IACUC: The April and October 2016 IACUC reports to the Institutional Official were not signed by a majority of the IACUC members. The deficiencies identified in the two IACUC reports did not always designate the deficiency as significant or minor and did not always include a correction plan and date. The IACUC report provides important information to the Institutional Official regarding the importance of each of the deficiencies with a reasonable and specific plan and schedule with dates for correcting each deficiency so the Institutional Official may ensure that the corrections are completed and the facility is in compliance with the Animal Welfare Act, regulations and standards. Correct by ensuring future IACUC reports to the Institutional Official are signed by a majority of the IACUC members, designate any deficiencies as either significant or minor, and include a correction plan and date. Correct for the spring 2017 IACUC report to the Institutional Official.

### 2.31(c)(6)

#### INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

Section 2.31(c)(6): The written procedures for the dog/cat spays and neuters have been approved by the attending veterinarian but not by the facility IACUC. These procedures must include all the required information for animal activity proposals (protocols) and be submitted to the facility IACUC for review and approval to comply with the animal welfare regulations. Correct by having the IACUC review and approve protocols for dog/cat spays and neuters. Correct before performing these procedures on regulated dogs and cats.

### 2.31(e)(3)

#### INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

Section 2.31(e)(3): The dog, cat and rabbit lab animal activity proposals (protocols) did not provide a description of the restraint techniques and eye diagnostics being taught to the students. A complete description of all proposed uses of the animals is necessary to ensure the procedures involving animals avoid or minimize discomfort, distress and pain to the animals and to comply with the animal welfare regulations. Correct by including a description of the restraint techniques and eye diagnostics being used in the dog, cat and rabbit lab protocols. Correct by February 17, 2017.

Prepared By: MARY GEIB, D V M USDA, APHIS, Animal Care
