

## Inspection Report

D E W Haven  
918 Pond Road  
Mount Vernon, ME 04352

Customer ID: **322927**  
Certificate: **11-C-0017**  
Site: 001  
D E W HEAVEN

Type: ROUTINE INSPECTION  
Date: 23-AUG-2016

### 3.80

#### PRIMARY ENCLOSURES.

The Patas monkey enclosure has been constructed with a bottom frame of telephone poles. The front side of this enclosure has some areas where rocks have been placed to cover holes between the bottom of the frame and the ground. However, some small holes are still present. To ensure the safety of the primates, this area will need to be addressed.

\*\*\*To Be Corrected By: August 26, 2016

### 3.125(a)

#### FACILITIES, GENERAL.

1. At the time of this inspection it was noted that the binturong and cavey enclosures were in need of repair. There is chainlink fencing under the dirt / substrate. However, there are a few places where the dirt has eroded away and now the fencing is exposed. To ensure that these animals are not injured on these sections of fencing they will need to be covered up in some manner.

\*\*\*To Be Corrected By: August 26, 2016

2. The pool in the black bear enclosure is a free, form cement structure. However, there is one area along the front edge that the dirt has eroded away, or the bears have dug out. To ensure the safety and integrity of the pool edge, this area will need to be addressed.

\*\*\*To Be Corrected By: August 26, 2016

3. The pen that housed 3 wallabies is in need of attention. There is an extra piece of chainlink fencing, in the front right corner, that has been folded over and attached to the adjacent fence. However, this fence has begun to detach and is now protruding into the primary enclosure. To ensure that the wallabies are not injured on this fencing it will need to be addressed.

\*\*\*To Be Corrected By: August 26, 2016

4. The left side of the "Nanny goat pen" is in need of attention. The posts are leaning and the fencing is detaching

Prepared By: JAN BALTRUSH, A C I USDA, APHIS, Animal Care

## Inspection Report

---

from these posts. To ensure the integrity of this fencing, and the safety of the goats, this fence line will need to be addressed.

\*\*\*To Be Corrected By: September 4, 2016

5. The tiger enclosure, on the corner, that houses the 2 younger cats, is in need of repair. The front, right corner has 12' chainlink fence attached to a top rail. However, 2 sections have detached from this top rail. There is now a gap in the fence. To ensure the integrity of this fence this area will need to be addressed.

\*\*\*To Be Corrected By: September 4, 2016

An exit interview was conducted with the licensee.

The inspector completed this inspection report when Animal Care was transitioning to a new information management system. Because the inspector re-typed the inspection report into the new system when it was deployed, the "prepared by" date on this inspection report is different than the date the inspector prepared the original inspection report, which occurred on August 23, 2016.
