

Inspection Report

Silverman's Farm Inc
451 Sport Hill Rd
Easton, CT 06612

Customer ID: **2294**
Certificate: **16-C-0013**
Site: 001
Silverman's Farm Inc

Type: ROUTINE INSPECTION
Date: 11-MAR-2024

3.130

Watering.

The water buckets in several enclosures ("Jacob sheep pen", "Angora goats pen", and "Alpaca pen") were noted to be dirty and had a dried dark colored residue on the sides above the water line plus dirt/particulate material on the bottom of the buckets.

Per this Section, all water receptacles shall be kept clean and sanitary. Dirty water receptacles can affect the quality and palatability of the water, and the animals may decrease their intake of water. Correct by 3/18/24.

3.131(a)

Sanitation.

The shed in the Pot belly pig enclosure needed to be cleaned. The floor of the shed had an accumulation of fecal matter present on the surface of the floor adjacent to the walls that was several inches deep and there was an unpleasant odor.

Per this Section of the Regulations, excreta shall be removed from primary enclosures as often as necessary to minimize disease hazards, to reduce odors, and prevent contamination of the animals. The shed in the pot belly pig enclosure needs to be cleaned more frequently for the health and well-being of the animals.

Correct by 3/18/24.

This inspection and exit briefing were conducted with facility representative.
