Type: ROUTINE INSPECTION
Date: 09-MAY-2014

3.4(b) REPEAT

OUTDOOR HOUSING FACILITIES.

(b) Shelter from the elements.

There was one adult, female, chocolate Labrador Retriever in an outdoor enclosure that did not have adequate shelter. At 2pm on 5/9/14 the licensee had moved the dogs from a shared enclosure with one dog house, back into two separate enclosures. The dog in the enclosure to the right did not have a shelter. It rained the previous day and the National Weather Service provides a local forecast with rain and thunderstorms for the next 4 days. Adequate shelter is necessary to protect the animals from the elements. The licensee shall provide one or more shelter structures that are accessible to each animal in each outdoor facility, and that are large enough to allow each animal in the shelter structure to sit, stand, and lie in a normal manner, and to turn about freely. In addition to the shelter structures, one or more separate outside areas of shade must be provided, large enough to contain all the animals at one time and protect them from the direct rays of the sun. Shelters in outdoor facilities for dogs or cats must contain a roof, four sides, and a floor.

This focused inspection and exit briefing was conducted with the licensee on May 9, 2014. The non-compliant item was discussed with the licensee during the inspection. This inspection was limited to the direct item 3.4b found during a routine inspection on May 7, 2014. The report was delivered to a facility representative.
