Certificate: **74-C-0052**
Site: 001
City of El Paso

Type: ROUTINE INSPECTION
Date: 01-OCT-2019

3.84(d)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

In a building housing multiple indoor exhibits, there were five live roaches observed on the rocks and floor in the enclosure housing two white-fronted marmosets and one southern tamandua. Pest control measures must be maintained to prevent the harborage of pests, i.e. insects. Effective pest control measures must be identified and implemented to eliminate breeding and living areas for the roaches to minimize exposure to pathogens that may cause illness. An effective program for control of insects must be established and maintained so as to promote the health and well-being of the animals and reduce contamination by pests in animal areas.

TO BE CORRECTED BY OCTOBER 9, 2019.

3.106(b)(3)

WATER QUALITY.

The quarantine pool that is accessible by the female California sea lion was not being routinely tested for coliform bacteria. It is important to sample and test water at least once a week for coliform count to maintain water quality standards. Water in the quarantine pool shall be sampled and tested for coliform count at least weekly and tested for pH and other chemical additives at least daily.

TO BE CORRECTED BY OCTOBER 9, 2019.

This inspection was conducted on October 1st & 2nd with facility representatives. The exit interview was conducted on October 2nd with facility representatives.

Additional Inspectors

Sismour Naomi, Veterinary Medical Officer
