Type: ROUTINE INSPECTION
Date: 23-OCT-2024

2.126(a)(2)

Access and inspection of records and property; submission of itineraries.

The facility representative was not able to locate any of the records during the inspection. Missing records included the Program of Veterinary Care, acquisition forms, inventory records, disposition forms, the contingency plan, and the environment enhancement plans for the birds. Not being able to locate the records doesn't allow for APHIS officials to ensure that veterinary care is being provided as per the directives in the Program of Veterinary Care, doesn't allow for APHIS officials to properly track animals going through the licensee's facility, doesn't allow APHIS officials to ensure a proper emergency management plan is in place, and doesn't allow APHIS officials to ensure a proper environment enhancement plan is in place for the birds. The licensee must be able to locate and provide all required records to APHIS officials during future inspections. Correct by 11/23/24.

This inspection and exit interview were conducted with the facility representative.

End of report.
