Certificate: **58-R-0021**

Site: 001

MANNHEIMER FOUNDATION INC

Type: ROUTINE INSPECTION

Date: 07-AUG-2014

2.31(c)(7)

INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

Protocol 2014-04, reviewed and approved by the IACUC describes use of the anti-cholinergic medication Atropine pre-operatively. Animal records indicate that a different anti-cholinergic medication (Glycopyrrolate) is currently being used. This medication is commonly used in veterinary medicine, although the currently used medication is not described in the protocol.

Significant changes regarding the care and use of animals in ongoing activities, including changes in medications used for major procedures outlined in a protocol, must receive IACUC review and approval prior to implementation. The above changes and all future significant changes must be reviewed by the IACUC to ensure appropriate IACUC oversight as required under the Animal Welfare Act.

Correct by next procedure.

The inspection was conducted on 8/7/14 and the exit briefing was conducted on 8/8/14 with the Staff Veterinarian and the Director.

Prepared By: CHRISTINA DER, D V M USDA, APHIS, Animal Care
