FACILITIES, GENERAL.

The floors of the mammal house had many various sized holes in the tile that exposed the cement beneath. The holes in the tiles ranged from dime sized to approximately 5 inches in length. These holes in the tiles make it very difficult to keep the floor clean and sanitized. It is the facilities responsibility to keep the buildings (floors, walls, ect.) in good repair.

***To Be Corrected By: February 26, 2017

The inspection and exit briefing were conducted with Licensee.
