

Inspection Report

DeLavan Lake Animal Park
5065 State Rd 50
DELAVAN, WI 53115

Customer ID: **7752**
Certificate: **35-C-0189**
Site: 001
EXOTIC ENTERPRISES, INC

Type: RE-LICENSE INSPECTION
Date: 21-SEP-2021

3.75(a)

Housing facilities, general.

There is an area of small holes in the painted wooden sheeting above the lemur's perch and a mouse was observed on the insulation side of the hole. The holes, if left unaddressed, could become larger and potentially compromise the ceiling around them. Ensure that this area is repaired/replaced and maintained in good repair.

3.81

Environment enhancement to promote psychological well-being.

The facility provides enrichment, however the environmental enhancement program was not available for inspection. A plan for environmental enhancement that documents the plan to provide enrichment and special considerations (such as single-housed non-human primates) must be directed by the attending veterinarian and available for inspection. This is necessary to ensure the psychological well-being of the animals. Ensure that a documented plan for environmental enrichment that addresses the required elements is maintained and available for inspection.

3.84(d)

Cleaning, sanitization, housekeeping, and pest control.

A mouse was observed above a small hole in the ceiling of the lemur enclosure. The facility has a professional pest control program in place, however this area hasn't been addressed by the program. The presence of mice above the

Inspection Report

enclosure could contaminate the lemur's area and cause a health hazard. Ensure that this area is addressed with a safe and effective pest control program.

3.125(a)

Repeat

Facilities, general.

1. The African crested porcupines' enclosure is in disrepair. The animals' shelter entrance doorway has multiple wires exposed that are accessible to the animals. The exposed wires are the result of the animals chewing and removing the wood framing around the shelter entrance doorway. These exposed wires could injure the animals. Ensure the enclosure is maintained in good repair.

2. The Patagonian cavy enclosure is in disrepair. The animals have dug at least three holes in the ground, along the fence line. The holes ranged in size from approximately 6 inches to 1 foot wide and approximately 3-4 inches deep. The animals could continue to dig and escape from the enclosure if the holes aren't addressed. Ensure the enclosure is maintained to contain the animals.

3.129(a)

Feeding.

The facility is feeding strictly chicken thighs without vitamin supplements to the Eurasian lynxes and bobcats. This diet lacks vitamins and minerals that these nondomestic cats need. Feeding an improper diet could cause the animals to develop health problems. Ensure that a balanced diet with essential vitamins and minerals is provided.

This is a 1st Re-License Inspection for a Class "C" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 2 more inspections or by 11-20-21 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.
