Type: ROUTINE INSPECTION
Date: 06-NOV-2017

3.26(a)

FACILITIES, INDOOR.

The building's temperature inside during inspection was 52 degrees F (measured on the kestrel) and the facility has not connected the heater installation. While the guinea pigs aren't displaying signs of being cold today, this week's outdoor temperature is forecasted to get much colder by Thursday night. Cold temperatures may cause discomfort to animals and increase risk for health problems. The facility must install the heater and not allow the indoor temperature to fall below 60 degrees F.

Correct by 11/9/17.

This inspection and exit interview were conducted with a facility representative.
