Type: ROUTINE INSPECTION  
Date: 29-JAN-2024

---

### 2.131(b)(1)

#### Handling of animals.

On August 24, 2023, the license was transporting a dog. After stopping for a rest break for the dog to relieve himself, the animal was released from its seat belt then bolted out of the vehicle. According to the registrant, the dog was running loose in the rest area and surrounding woods. Efforts were made to capture the dog by the registrant as well as the public. The dog was eventually captured and safely returned to the vehicle. The dog was probably stressed due to the escape and efforts to capture it. The dog's ability to escape indicated that handling was not completed quickly and carefully as possible.

Handling of all animals shall be done as expeditiously and carefully as possible in a manner that does not cause trauma, overheating, excessive cooling, behavioral stress, physical harm, or unnecessary discomfort.

### 3.15(a)

#### Primary enclosures used to transport live dogs and cats.

The registrant transported a dog in a vehicle and it was only secured by a dog seat belt, which attaches to the dog's collar and vehicle seatbelt hook. The registrant did not utilize a primary enclosure in order to contain the dog that was being transported.

The dog or cat must be contained in a primary enclosure such as a compartment, transport cage, carton, or crate.

This inspection and exit briefing were conducted with the registrant.
