3.56(a)(1)

Sanitation.

There were accumulations of excreta on top of the wire flooring in the third bottom enclosure on the right side of the rabbit room. Inadequate cleaning of primary enclosures can expose the rabbits to potential disease hazards and uncomfortable quarters. Correct by ensuring that primary enclosures are kept reasonably free of excreta by regular cleaning. Correct by December 12, 2023.

This inspection and exit interview were conducted with the licensee.
