HOUSING FACILITIES, GENERAL.

The blankets that are used as chimp bedding and being stored in the sheltered area outside the Health Center had rodent feces underneath the blankets on the shelves.

Bedding contaminated with rodent feces can cause disease hazards.

The facility must ensure that bedding is stored in a manner that prevents vermin infestation. The bedding should not be used until it has been properly cleaned.

To be corrected by September 05, 2014.

Exit interview conducted with a facility representative.
