Type: ROUTINE INSPECTION
Date: 04-AUG-2015

2.38(g)(1)(2)

MISCELLANEOUS.

The current numbering system in use for identifying the dogs allows the three digit tattoo animal number provided at the facility to be reused. Since the dogs arrive at the facility with an original tattoo from the vendor in one ear and then are given the additional three digit identifier while at the facility, combining the tattoo numbers gives each animal a separate ID number. This system is okay as long as both numbers are referred to in the animal records. Some of the animal records reviewed only refer to the three digit ID given at the facility, which may be on more than one dog, creating confusion when connecting the animal records to the individual dogs. Both numbers will need to be referred to on the animal records to prevent misidentification. Correct by August 31, 2015.

3.1(e)

HOUSING FACILITIES, GENERAL.

The cabinet in cat room 02 has treats stored with liquid cleaning supplies. This increases the risk of contaminating food through possible spillage of the chemicals onto the food items. Ingestion of these chemicals may cause illness or death. Food items and chemicals shall be stored separately to protect the food from accidental spillage of the chemicals which may cause contamination. Correct by August 12, 2015

Inspection and exit briefing conducted with the Research Coordinator and Facility Manager.
