

## Inspection Report

Critter Camp Exotic Pet Sanctuary  
824 Church Street  
German Valley, IL 61039

Customer ID: **321255**  
Certificate: **33-C-0382**  
Site: 001

CRITTER CAMP EXOTIC PET SANCTUARY

Type: ROUTINE INSPECTION  
Date: 19-MAY-2014

### 3.125(a)

#### FACILITIES, GENERAL.

1. The kinkajou enclosure is in disrepair. A sharp, rusted metal edge is exposed to the two kinkajous in their shared enclosure. The sharp, rusted metal edge, approximately six inches long, is located on the sheet metal that surrounds the bottom of the enclosure. Two additional areas of the sheet metal are excessively rusted. Additionally, there is two by two inch hole in the enclosure wire shelving. This hole has exposed several sharp wires.

The sharp, rusted edge and the wires could potentially injure the kinkajous. The excessive rust can no longer be properly cleaned and sanitized.

Assure that the kinkajous are housed in an enclosure that is structurally sound and protects them from injury.

To be corrected: 5-23-14

2. The outside fox enclosure is in disrepair. A portion of the buried cyclone fence has been unearthed by the fox. A single connecting point of the buried cyclone fence has become unattached from the fence post.

The unattached fence could potentially allow the fox to escape.

Repair or replace the affected are of the buried fence.

To be corrected: 5-23-14

### 3.131(a)

#### SANITATION.

Excessive dirt, grime, and hazing are present on three enclosures containing five spiny mice and two gerbils. The animals are housed in glass aquariums. Excessive dirt and grime can produce animal disease hazards.

## Inspection Report

---

Clean and sanitize the affected enclosures and repeat as necessary to prevent build up.

To be corrected: 5-23-14

### 3.131(d)

#### **SANITATION.**

Excessive gnats/small flies were present in the two enclosures housing five spiny mice and in the room containing the two kinkajous. The gnats/ small flies were observed inside each of the animal enclosures. There were no provisions in place to control flies at the facility during the time of inspection. Gnats/small flies can carry and spread disease hazards.

Implement and maintain an effective program for the control of flies at the facility.

To be corrected: 5-26-14

The inspection exit briefing was conducted with the facility President.
