CURIOUS CREATURES

Type: ROUTINE INSPECTION
Date: 10-SEP-2015

3.131(c)

SANITATION.

One of the chinchilla enclosures had two metal shelves which the surfaces were actively rusting with flakes of rust. The shelves had evidence of use by the animal's waste and bedding on them. They were situated above the food dish. Rust is not readily sanitizable and flakes of rust can be ingested and potentially cause harm. Enclosures must be kept in good repair in order to protect the animals from injury and to facilitate the prescribed husbandry practices of the Animal Welfare Act.

Correct by Sept 17, 2015

An exit briefing was conducted with facility representatives.
