Type: ROUTINE INSPECTION
Date: 08-APR-2024

3.56(a)(3)

Sanitation.

There are accumulations of excreta and debris in the pans below the wire floors for the rabbit enclosures. Failure to empty pans at least once a week to remove accumulations of excreta and debris can affect the health of the rabbits. Licensee must ensure that pans are emptied at least weekly to prevent odors, soiling of the rabbits, and respiratory problems. Correct by April 9, 2024.

This inspection and exit interview were conducted with the licensee.
