LYLE MILLER

Type: ROUTINE INSPECTION
Date: 15-OCT-2015

2.40(b)(2) REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

An adult male fawn colored Pug named 'Herbie' and identified by microchip number (956000004241246) has an abnormal right eye. The right eye is more prominent and larger than the left eye. It has a greenish-yellow discharge coming from the eye and a crusty appearance around the bottom edge of the eyelid. The licensee stated the dog's eye was not currently being treated. The licensee also stated the dog was observed by the attending veterinarian during the annual facility inspection in May 2015. However, the licensee does not have any medical records from the attending veterinarian as to what the diagnosis is and what treatment plan is recommended.

The abnormal appearance of the eye could be an indication of injury, infection or other medical issues. The licensee must have this animal examined by a veterinarian to obtain an accurate diagnosis and appropriate treatment plan. Documentation should be available for all medical problems. The diagnosis and any recommended treatment must be part of this documentation. The licensee must ensure all animals receive adequate veterinary care at all times.

*The three female Pugs named Rachel (microchip 956000008485360), Eudora (microchip 053563279) and Barbara (microchip 010773026) that were listed under 2.40 (b)(2) on the previous inspection report received veterinary care.

Exit briefing conducted with the licensee.
