RAY STROM

Type: ROUTINE INSPECTION
Date: 09-MAY-2019

3.75(c)(1)

HOUSING FACILITIES, GENERAL.

The ceiling in the indoor enclosure for the lemurs is constructed of drywall. This material cannot be readily cleaned and sanitized. In addition, there is deterioration/staining present along the drywall seam in the center of the ceiling. Appropriate surfaces in an animal housing facility promote good husbandry and disease control efforts. The licensee plans to install suitable panels on the ceiling.

To be corrected by: July 9, 2019

This inspection and exit briefing were conducted with the facility representative.
