ANIMAL ENTERTAINMENTS INC

Type: ROUTINE INSPECTION

Date: 04-SEP-2024

3.131(d)

Sanitation.

In the building housing the Egyptian fruit bats, there were at least 3 different mice seen in the exhibit going to food on the floor and into holes between enclosure walls. The facility has started to employ increased rodent control measures in this area and plans to increase the rodent control and exclusion between the exhibits. Rodents inside of animal housing areas can spread disease or bring in disease, so it is important to ensure that a safe and effective program for controlling pests such as mice is maintained. Ensure that the pest control program is safe and effective by not allowing mice to get into animal housing areas in this building.

***Correct by 9/18/2024.

This inspection and exit interview were conducted with facility representatives.
