2.40(b)(2) REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Yorkie microchip Avid 092-309-314 was observed to have a big white spot in the right eye, this animal not been treated for this eye problem. Eye injuries are painful and may increase with time, may also limit the vision until losing it completely.

This dog needs to be seen by the attending veterinarian. Documentation of the diagnosis, recommended treatment and treatment of the dog must be maintained.

Correct by: Remains uncorrected

This dog need to be evaluated by the Attending Veterinarian by 8/18/2015

2.40(b)(3)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Yorkie microchip Avid 092-309-314 was observed to have a big white spot in the right eye

This health problem on this animal was not observed or identified before the time of inspection. The daily observation of the animals can be conducted by the veterinarian or by the licensee, as long as any changes in animal health are communicated to the veterinarian.

The failure to observe the animals daily can lead to health problems that are not identified or treated in a timely manner. Untreated health problems can affect the health and well-being of the animals.

The licensee must observe each animal on a daily basis. If changes in animal health are noticed, these changes should be documented and must be treated by following the PVC. If the PVC does not describe the treatment for
