Certificate: **34-C-0424**

Site: 001

DETROIT ANIMAL WELFARE
GROUP

Type: ROUTINE INSPECTION

Date: 02-DEC-2024

3.125(a) Critical

Facilities, general.

- On July 11, 2024 the only llama at the facility, that was acquired on October 3, 2023, got its head stuck in a gap between the gate and the wall of the primary enclosure and died.

- The primary enclosure housing two foxes, Kit and Kat, has an area of exposed dig barrier fence that has sharp points and has been dug underneath the barrier which could cause a foot or leg to become entrapped causing injury. Another fox enclosure housing two foxes, between the hay/straw barn and the enclosure with two cows, also has the dig barrier exposed. This area is directly in front of an igloo shelter and could also cause injury if a fox were to get a foot or leg caught.

Inadequate facility construction for the animal being housed in enclosure can lead to injury or death. Lack of facility maintenance can also lead to injury.

The facility must be constructed of such material and of such strength as appropriate for the animals involved. The indoor and outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

To be corrected by December 9, 2024

This inspection and exit interview were conducted with a facility representative.
