Certificate: 93-R-0066

Site: 001

SALK INSTITUTE FOR BIOLOGICAL STUDIES

Type: ROUTINE INSPECTION

Date: 17-SEP-2015

2.31(c)(7)

INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

The IACUC approved policy on Food and Fluid Restriction states that in cases of fluid restriction, "body weight should be documented at least once a week for larger species". Records provided for a non-human primate (NHP) show fluid was restricted to this animal on 5/4/14 and 5/5/14. Weights were not recorded at least once a week before or after these dates. The approved IACUC policy was not followed by the facility.

A system must be in place to ensure that policies approved by the IACUC are followed as directed to ensure the health and well-being of the animals.

To be corrected from this day forward

2.33(r)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE.

There was no entry made in the medical records for the procedures performed on a non-human primate that was sedated and later euthanized on April 7, 2015. According to the clinical veterinarian, the procedure was done because the veterinarian suspected an abscess around a cranial implant.

Complete and accurate medical records are necessary to be consistent with the standards of adequate veterinary care.

A system should be in place to ensure medical records are kept current and up to date following a medical procedure. To be corrected from this day forward

An exit briefing was conducted with the facility representatives.

Accompanied on inspection by Dr. Tyler Fields, Veterinary Medical Officer

Additional Inspectors

Fields Tyler, Veterinary Medical Officer
