Lamar, MO 64759

Customer ID: **4633**
Certificate: **43-A-5738**
Site: 001
MARION GIGER & LEILA GIGER

Type: ROUTINE INSPECTION
Date: 16-DEC-2015

2.75(a)(2) REPEAT

RECORDS: DEALERS AND EXHIBITORS.

Sec. 2.75 Records: Dealers and exhibitors. (a)(2)

*** The APHIS form 7005 shows 46 dogs in the facility and the physical count of dogs was 51. The discrepancy in numbers shows the form is not being up dated on a regular basis. The 7005 form must be kept up to date to accurately show the number of dogs in the facility, where they came from and where they have gone.
by 12-31-2015

*** The APHIS form 7005 shows six dogs with no identification numbers listed in column A. Licensee states the dogs have micro chip number and that she just forgot to list the numbers. The lack of identification numbers for the dogs shows that the 7005 form is not being up dated on a regular basis. APHIS form 7005 must be up dated on a regular basis to contain all the required information.
To be corrected by 12-31-2015

3.4(b)(4)

OUTDOOR HOUSING FACILITIES.

Sec. 3.4 Outdoor housing facilities. (b) Shelter from the elements. (4)

**** Two enclosures in the barn containing two dogs each, no bedding is present in the dog house. The temperature in the barn is 45 degrees F.

**** Two enclosures on the west side of the barn containing 4 and 3 dogs respectively, no bedding is present in the dog house. The temperature around these enclosures is 35 degrees F. Without bedding in the dog house when the temperature is below 50 degrees F, allows the cold weather to impact the dogs. When the temperature is below 50 degrees dry cleaning bedding must be used in the dog houses. When the temperature is below 35 degrees F additional dry cleaning bedding is used in the dog houses to protect the dogs from the cold weather.
To be corrected today.

Inspection Report

3.6(a)(2)(2)

PRIMARY ENCLOSURES.

Sec. 3.6 Primary enclosures. (a) General requirements. (2) ii)

**** The second building east side, the coated expanded metal flooring were two sections, in one enclosure containing one dog, joined together is no longer braced correctly and allows the wire to separate and sag. The separation allows the edge of one section allows the dog to injure themselves and the sagging will alter the dogs gait and posture while walking or standing in the enclosures.

To be corrected by 01-15-2016

Inspection and Exit interview conducted with facility representative.
