

## Inspection Report

James Rose  
4384 Newark Rd  
Attica, MI 48412

Customer ID: **326277**  
Certificate: **34-A-0198**  
Site: 001  
JAMES ROSE

Type: ROUTINE INSPECTION  
Date: 20-NOV-2025

### 2.40(a)(1)

#### Repeat

#### Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The licensee has not had regularly scheduled visits by the attending veterinarian identified in the Program of Veterinary Care. Licensee records showed that the last time the attending veterinarian visited the establishment was 8/10/2023. Staff at the clinic of the attending veterinarian confirmed that the licensee's facility has not been visited since 8/10/2023 and that the practice has been for the attending veterinarian to visit one per year.

Infrequent routine facility visits by the attending veterinarian could adversely impact the health and well-being of the animals at the facility.

Regular visits to the premises by the attending veterinarian, as prescribed by the attending veterinarian, must be performed.

### 2.75(b)(1)

#### Repeat

#### Records: Dealers and exhibitors.

At the time of the inspection, the licensee did not have records of acquisition for any of the skunks present at the facility. In addition, the licensee did not have a record of disposition for one skunk that was present at the facility at the time of the previous inspection on 7/29/2025.

Accurate and well-maintained records of acquisition and disposition of animals is critical to ensure a thorough inspection, to rapidly identify and trace animals in a potential disease outbreak, to make sure all animals are accounted for, and to verify animals at the facility receive adequate veterinary care.

The license shall make, keep, and maintain records or forms which fully and correctly disclose the information listed in 2.75(b)(1)(i)-(vii) concerning animals (other than dogs and cats) purchased or otherwise acquired, owned, held, leased, or otherwise in his or her possession or under his or her control, or which is transported, sold, euthanized, or otherwise disposed of by the licensee. The records shall include any offspring born or hatched of any animal while in his or her possession or under his or her control, to the extent that any identification or counting of offspring can be carried out without unduly disturbing nesting or rearing activities.

## Inspection Report

---

2.134(a)

Repeat

### Contingency planning.

At the time of inspection, the licensee had not developed a complete contingency plan. The contingency plan provided did not include specific tasks that would be carried out in response to the emergencies or disasters identified. Further, the contingency plan did not address how response and recovery would be handled in terms of materials, resources, and training needs.

A well-developed contingency plan is essential to ensuring the health and well-being of animals, in the event of an unanticipated emergency or disaster.

The licensee must develop, document, and follow an appropriate plan to provide for the humane handling, treatment, transportation, housing, and care of their animals in the event of an emergency or disaster (one which could reasonably be anticipated and expected to be detrimental to the good health and well-being of the animals in their possession). The contingency plan must include specific tasks that will be carried out in response to each identified emergency or disaster. In addition, the emergency plan must include how response and recovery will be handled in terms of materials, resources and training needs.

This inspection and exit interview were conducted with the licensee.
