### 3.127(c)

#### Facilities, outdoor.

There is standing water and thick mud surrounding the sole source of drinking water in the outdoor enclosure housing "Tundra", a male reindeer. The animal must walk through mud and water to access drinking water. Failure to provide adequate drainage in animal enclosures may result in their discomfort or development of adverse medical conditions. A suitable method shall be provided to rapidly eliminate excess water. The method of drainage shall comply with applicable Federal, State, and local laws and regulations relating to pollution control or the protection of the environment. During the inspection, the facility provided an additional receptacle containing drinking water on an area of dry ground in the enclosure.

Correct by 25 November 2025.

This inspection and exit interview were conducted with the licensee.
