Detroit Animal Welfare Group
78440 McKay Rd
Bruce Twp, MI 48065

Customer ID: **502451**

Certificate: **34-C-0424**

Site: 001

Detroit Animal Welfare Group

Type: ROUTINE INSPECTION

Date: 04-SEP-2025

3.127(d)

Facilities, outdoor.

At the time of inspection, there was no perimeter fence enclosing the outdoor facility housing coyote Mikasi, located on the southeast corner of the property. Further, the license did not have a variance approved by the administrator that would permit housing coyote Mikasi without a perimeter fence around his outdoor housing facility.

Perimeter fencing is important to protecting the animals at the facility from injury and disease. Perimeter fences can keep unwanted animals and unauthorized people from having unwanted contact with the animals at the facility. Perimeter fences can also serve as a secondary containment system for the animals.

Outdoor housing facilities must be enclosed by a perimeter fence that is of sufficient height (6 feet) to keep animals and unauthorized persons out. The fence must be constructed so that it protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with the animals in the facility, and so that it can function as a secondary containment system for the animals in the facility. It must be of sufficient distance from the outside of the primary enclosure to prevent physical contact between animals inside the enclosure and animals or persons outside the perimeter fence. Such fences less than 3 feet in distance from the primary enclosure, and less than 6 feet high, must be approved in writing by the Administrator.

To be corrected by close of business on October 3, 2025.

This inspection and exit interview were conducted with a facility representative.
