Certificate: **86-C-0100**

Site: 001

BEARIZONA WILDLIFE PARK, L L
C

Type: ROUTINE INSPECTION

Date: 22-SEP-2025

3.127(b)

Facilities, outdoor.

There is inadequate shelter space for 2 outdoor housed brown bears "Aurora" and "Denali". The approximately 2-year-old female bears have access to a single den constructed out of a hard plastic barrel (volume measuring approximately 1500 gallons). Failure to provide shelter from inclement weather for all animals kept outdoors may result in their discomfort or incompatibility between the animals. Natural or artificial shelter appropriate to the local climatic conditions for the species concerned shall be provided for all animals kept outdoors to afford them protection and to prevent discomfort to such animals.

Correct by 14 October 2025.

3.153(a)

Primary enclosures.

There is a fist-sized hole in the bottom corner netting of a primary enclosure for a Red-legged Seriema "Chopstix". Primary enclosures that are not kept in good repair may create hazards which can injure the birds housed within them or allow for their escape. Primary enclosures must be designed and constructed of suitable materials so that they are structurally sound. The primary enclosures must be kept in good repair. Corrected at time of inspection.

Correct from this date forward of 23 September 2025.

This inspection and exit interview were conducted with the facility representatives.
