### 3.125(a) Repeat

#### Facilities, general.

An arctic fox will jump up into the rafters of its enclosure. Sticking out from the ceiling/roof of the enclosure are nails. Nails sticking out as the fox goes into the rafter could potentially cause injury to the fox. The enclosure must be maintained in good repair to protect the animals from injury.

Note: The licensee fixed this during inspection.

This inspection and exit interview were conducted with the licensee.

End of report.
