Type: ROUTINE INSPECTION
Date: 10-SEP-2025

3.13(a)

Veterinary care for dogs.

Multiple animals have not been vaccinated for Bordetella as scheduled in the program of veterinary care (PVC). There is no record of Bordetella vaccination for 2 coydogs ("Yahoo" and "Toccoa") and 2 dogs ("Tater" and "Chappy"). One dog "Todd" was last vaccinated for Bordetella on 04/17/2022 and not every 3 years after an initial series as scheduled in the PVC. The animals appeared to be in good health during the inspection. Not vaccinating animals according to the PVC schedule does not adequately protect animals from diseases as intended by the attending veterinarian. Licensees must follow the written PVC for dogs which addresses the requirements for adequate veterinary care for contagious diseases and sampling and treatment of parasites.

Correct by 08 October 2025.

This inspection and exit interview were conducted with the licensee.
