### 3.127(d)

#### Facilities, outdoor.

The facility is lacking an adequate perimeter fence around the kangaroos. Fifty-two kangaroos are enclosed by a 6ft fence. The enclosure is set back away from the road but there is no additional fencing between the kangaroo enclosure and the road or along the driveway. A perimeter fence serves as a secondary containment should an animal escape and as a means to protect the animals from unauthorized persons and animal pests and predators. Correct by ensuring that enclosures housing regulated species are surrounded by a perimeter fence, at least 6ft tall and at least 3ft away from the enclosures, that prevents unauthorized people and animals from going under or through the fence. Correct by 12/12/25

This inspection and exit interview were conducted with a facility representative.
