### 2.1(b)(2)(i)

#### Requirements and application

Facility has more animals than what the license was issued for. In discussion, it appears that at the time of applying the licensee thought the total animals listed on box 11 of 7003A would be total adult animals maintained. There are fewer than 200 adults at the facility as were their intentions, however with offspring on hand counted there are 214 total animals at the facility. Licenses authorize increments of 50 animals on hand at any single point in time during the period of licensure and current license authorizes 200 animals total. Facility will need to ensure authorized maximum numbers are not exceeded; this can be done by re-applying for a increased maximum total or by breeding fewer animals (change amount of paired breeders to have less offspring).

Correct by April 9, 2026.

This inspection and exit interview were conducted with facility representatives.
