Lynnwood Park Zoo  
1071 Wells Road  
Jacksonville, NC 28546

Customer ID: **1927**  
Certificate: **55-C-0001**  
Site: 001  
Lynnwood Park Zoo

Type: ROUTINE INSPECTION  
Date: 10-DEC-2025

---

### 2.1(b)(2)(i)

#### Requirements and application

The facility has exceeded the maximum number of animals allowed on their license. The license has authorized up to 250 animals and the facility currently has 259 animals. The USDA license authorizes a specific number of animals to ensure that the facility and personnel possess adequate facilities, employees and education to provide sufficient husbandry to the regulated animals.

A licensee must obtain a new license before any change resulting in more than the authorized number of animals on hand at any single point in time during the period of licensure. Correct by 7 January 2026, by either reapplying for a license that properly reflects the number of regulated animals on the property or reduce the number of regulated animals to a number which is under the maximum threshold authorized under the current license.

### 3.158(a)(1)

#### Repeat

#### Cleaning, sanitization, housekeeping, and pest control.

Several enclosures are not being cleaned frequently enough, leading to an excessive accumulation of excreta. Three enclosures, housing a total of 17 pigeons have large accumulations of excreta, specifically in the nesting boxes. The waste piles occupy the majority of the floor of the nesting boxes, leaving only a few areas for nesting. Accumulation of feces and excreta can lead to increased disease hazards or illnesses. Correct by ensuring excreta is removed from primary enclosures and from under and around primary enclosures as often as necessary to prevent excessive accumulation of feces, to prevent soiling of the birds contained in the primary enclosures, and to reduce disease hazards, insects, pests, and odors.

This inspection and exit interview were conducted with the licensee.
