Certificate: **31-A-0616**
Site: 001
Nathan Miller

Type: RE-LICENSE INSPECTION
Date: 15-SEP-2025

3.13(a)(3) Repeat

Veterinary care for dogs.

The facility is not following the vaccination schedule in the written Program of Veterinary Care (PVC):

- The PVC states to administer Rabies vaccinations at 16 weeks of age and then 1 year of age. One male French Bulldog (4418) and one female French Bulldog (4402) did not receive their first rabies vaccination until they were approximately 14 months old. Additionally, the PVC states that animals are to receive Distemper and Parvovirus vaccines (7-way) at 11 and 16 weeks of age, these animals did not receive this vaccine until about 6 months of age.
- The PVC states that all adults must receive a heartworm test each year. Records indicate that the last time heartworm testing was performed was in February of 2024.

Failure to administer required vaccines and perform heartworm test sampling in accordance with a veterinary approved schedule may result in animals to not be adequately protected against disease and can cause pain and distress. Correct by ensuring all animals are vaccinated and tested in accordance with the schedule approved by the Attending Veterinarian and contact the Attending Veterinarian to create a plan to determine when to administer future vaccinations and when testing will be performed for these animals.

3.13(b)(3)

Veterinary care for dogs.

The facility does not maintain complete medical records for all animals. Medical records indicated that adult female French Bulldog (9782) was overdue for the Distemper and Parvovirus vaccinations and adult female French Bulldog (0054) was overdue for Distemper, Parvovirus, and Rabies vaccinations. The facility states that these animals were up to date on these vaccinations but they did not record that information in the medical record.

Failure to maintain adequate medical records may interfere with the ability of APHIS officials to determine if the animals are receiving adequate veterinary care. Complete medical records must be maintained and include the names of all vaccines and treatments administered and the dates of administration. Correct by documenting all treatments given and ensure that medical records are complete and contain the required information.
