Type: ROUTINE INSPECTION
Date: 12-JAN-2026

2.40(b)(2)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

Inside the shelter building there were several medications and supplements. Four medications were expired or had no label.

Pyrantel oral medication expired in March 2025
Clindamycin oral medication expired in November 2019
Albon oral medication with no expiration date
Bottle of white oral medication with no label

The use of expired medication and unlabeled medications with an unknown expiration date, is not considered to be a safe or appropriate method to prevent, control, diagnose, and treat diseases and injuries because expired drugs may be ineffective or produce other undesired effects. Animals may experience discomfort or distress due to unrelieved symptoms or unexpected side effects from the use of expired medication. The facility must ensure all medications in the kennel are not expired.

To be corrected by 13 January 2026

This inspection and exit interview were conducted with a facility representative.
