### **3.150(a) Critical**

## **Facilities, general.**

A primary enclosure failed to protect birds from injury. Five diamond doves were found dead on exhibit on 25-August-2025. The birds were discovered on exhibit wedged in between fencing and a howdy cage inside the primary enclosure. According to conversations with facility representatives' bamboo fencing was added to the enclosure to keep the howdy cage out of public view. The fencing was removed by the facility immediately following the incident. Failure to ensure that objects in the enclosure are safe for all birds present can lead to stress, injury, or death. Correct by ensuring that enclosures are kept in good repair, protect the birds from injury, and restrict other animals from entering that may negatively affect the welfare of the birds within. Correct by 17-September-2025.

This inspection and exit interview were conducted with Facility Representatives.
