## JACKSONVILLE ZOOLOGICAL SOCIETY

Type: ROUTINE INSPECTION

Date: 29-SEP-2025

## **Handling of animals.**

On August 26, 2025, a keeper; mistakenly opened the wrong shift door between three Guinan squirrel monkeys and 2 howler monkeys. The keeper realized that the wrong door was open but one female Guinan squirrel monkey had entered the howler monkey enclosure. Upon entering the enclosure the squirrel monkey was attacked by the female howler monkey. The keeper, along with the help of another keeper, opened the gate to back holding and the squirrel monkey was able to escape into a safe space separate from the howler monkeys. The keepers noted that there was a "substantial wound behind the left knee." The keepers netted the squirrel monkey and brought the animal to the veterinary hospital. The animal was humanely euthanized following evaluation by the veterinarian.

Improper handling, in this case shifting, of animals can affect the well-being of the animal and even lead to injury and/or death. Handling of all animals should be done as carefully as possible in a manner that does not cause trauma and physical harm. In response to the incident, the facility added an additional ring for gates between incompatible animals, which is used as a tool to have the keepers stop and confirm they are opening the right gates.

Corrected at time of inspection, September 30, 2025

This inspection and exit interview were conducted with facility representatives.

#### **Additional Inspectors:**

E Nohely Rodriguez, VETERINARY MEDICAL OFFICER
