Farm

Type: ROUTINE INSPECTION

Date: 08-JAN-2026

---

### **2.40(b)(2)**

#### **Attending veterinarian and adequate veterinary care (dealers and exhibitors).**

The facility is unable to use appropriate methods to control and treat diseases due to some expired medications/solutions. There are bottles of expired sheep dewormer, Cydectin, and iodine, used for soaking feet, open and intermingled with their currently used medical products. Expired medications/solutions can lose their potency and strength, leading to ineffective or underdosed treatments for diseases or injuries. Correct by 15 January 2026 by ensuring all medications/solutions being used to treat animals are within date and stored appropriately to maintain the effectiveness of product.

This inspection and exit interview were conducted with the farm manager.
